

Proposal to set up a Photography Club in the school.

Introduction:

Photography is a new passion and a way of life adopted by the new generation. It is also an art in itself. As the head girl of the school, I have been given the responsibility of setting up a Photography Club.

Objectives:

- Students can take up photography as a profession and excel in it in their own way.
- A knowledge of photography also helps in making students aware of their surroundings, whether beautiful or ugly.

Measures:

- An open place with lot of subjects to focus on can be used as the location of the club.
- A committee of six members, students and teachers, to be formed who will meet every Monday at 11 a.m.
- A list of interested students must be prepared.
- A trainer or guide who has a good knowledge of photography to be appointed for training and helping the interested students.
- Books on photography and photography themes to be purchased.
- The members must carry their personal digital cameras.
- The budgetary requirement for the club can be met through a contribution of hundred rupees per month by the members of the club.

Hope all the efforts and arrangements made by us would bring in a good result.
